Alan G Johnson, Paul R. V. Johnson : Making Sense of Medical Ethics: A hands-on guide (Hodder Arnold Publication) before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Sense of Medical Ethics: A hands-on guide (Hodder Arnold Publication):

The practice of clinical medicine is inextricably linked with the need for moral values and ethical principles. The study of medical ethics is, therefore, rightly assuming an increasingly significant place in undergraduate and postgraduate medical courses and in allied health curricula. *Making Sense of Medical Ethics* offers a no-nonsense introduction to the principles of medical ethics, as applied to the everyday care of patients, the development of novel therapies and the undertaking of pioneering basic medical research. Written from a practical rather than a philosophical perspective, the authors call upon their extensive experience of clinical practice, research and teaching to illustrate how ethical principles can be applied in different 'real-life' situations. *Making Sense of Medical Ethics* encourages readers to understand the principles of medical ethics as they apply to clinical practice; explore and evaluate common misconceptions; consider the ethics underlying any medical decision; and as a result, to realize that a good appreciation of medical ethics will help them to practise more effectively in the future.

"The layout of the book makes it very accessible ... If you have never considered reading a book about medical ethics, this would be a good one to start with. even if you have read others, there is plenty in this one for it to make a useful addition to your collection." Bernard Foex, *Emergency Medical Journal*

About the Author Alan G. Johnson is Emeritus Professor of Surgery at the University of Sheffield, UK and has lectured widely on medical ethics. Paul R. V. Johnson is Reader in Paediatric Surgery at the University of Oxford and Honorary Consultant Paediatric Surgeon at the John Radcliffe Hospital, Oxford, UK. He is also Director of the Oxford Pancreatic Islet Transplant Programme.
