didn't try to fit the whole set into one book, and it came out great. The pages are printed on heavy paper. The text is complete and well sized. I would prefer hardcover, but of course that would add cost. My only complaint is that these books are 30 cm tall. Most of my books are between 23 cm and 26 cm tall. I would like these to be about 25 cm tall even if that would mean making them thicker or increasing the number of volumes. You would think that for a seven volume set, they would have enough sense to include in the listing which chapters are in which books. Since they didn't bother with that, here it is: Vol 1: Chapters 100 - 600, plus the Forward and Introduction Vol 2: Chapters 700 - 900 Vol 3: Chapters 1000 - 1700 Vol 4: Chapters 1800 - 2100 Vol 5: Chapters 2200 - 2800 Vol 6: Appendices I, II, L and R Vol 7: Appendices T, AI and P, plus the Index, Form Paragraphs and Instructions Of course the whole thing is available on-line, [...], for anyone who can do without the books. Don't buy, download directly from USPTO By val321 No value in buying this large and expensive book. You can download, for free, a searchable PDF directly from the USPTO web site. www.uspto.gov/web/offices/pac/mpep/

Manual of Patent Examining Procedure (a.k.a. MPEP): Original 9th Edition (March 2014) (A work in 7 volumes) This Manual is published to provide U.S. Patent and Trademark Office (USPTO) patent examiners, applicants, attorneys, agents, and representatives of applicants with a reference work on the practices and procedures relative to the prosecution of patent applications before the USPTO. It contains instructions to examiners, as well as other material in the nature of information and interpretation, and outlines the current procedures which the examiners are required or authorized to follow in appropriate cases in the normal examination of a patent application.
