Steve Fox, Paul Armentano, Mason Tvert : Marijuana is Safer: So Why Are We Driving People to Drink?
before purchasing it in order to gage whether or not it would be worth my time, and all praised Marijuana is Safer: So Why Are We Driving People to Drink?:

2 of 2 people found the following review helpful. Common Sense isn't so CommonBy Brian SaadyAs the tilte suggests, this book certainly compares the negative consequences of marijuana and alcohol. However, the title doesn't

represent the thorough nature of this book. "Marijuana is safer" covers numerous aspects of this issue including the racial ramifications, the legal marijuana economy, the special interests that prevent legalization, commercial hemp, and examples of covert government propaganda to misinform the public about marijuana. And that's just naming a few of the issues covered in this book. It is both an excellent source for scholarly research and a nice reference for casual readers. This book provides a wealth of excellently researched information. 3 of 3 people found the following review helpful. Everyone who ever had a beer should read this book. By PARADOC_PAULIEMuch has been written about the cost of drugs on society and in particular, the unrestricted dissolution of all our civil rights with this disingenuous and deadly War on drugs, specifically Cannabis funded by Oxycontin, Marlboro and Budweiser; fueled by our sensationalist media and impotent government, as unquestioned truth. The actual truth is far more inconvenient and more bizarre than any of us could have imagined. Here is this story. This book explains and highlights our society's unabashed approval of the marketing and consumption of toxic substances and similar demonization of "The most therapeutically beneficial plant on earth" according to a retired DEA judge. It also contains a section on addressing the most commonly disseminated myths about Cannabis. A MUST for any Cannabis-Activist. I have, personally, found it invaluable-well worth the price of admission. This book is in 3 parts, each more relevant than the last. Steve Fox, Paul Armentano and Mason Tvert with an utterly eye-opening foreword by former Seattle Police Chief Norm Stamper, deliver a straight forward, factual reckoning of this insanity we call a drug war. They examine, but do not criticize, enlighten and not preach; which is difficult as their subject matter is so highly relevant to all of us...right now. They allow the reader to draw her own conclusions about these issues. Our country is in "death-spiral" type of affair with tobacco and alcohol, fueled by Wall Street and Madison Avenue-we are truly being driven to drink. Despite the mountains of overwhelming scientific studies on the role of Cannabis and Human health, and considering that our "Office of National Drug Control Policy", (ONDCP) is funded by the Tobacco, Pharmaceutical and Alcohol industries-this book should be on everyone's "must read" list. They are telling our children it is NOT O.K. to do drugs, but it IS O.K. to use THEIR drugs. I can unequivocally state that I have not read a more engaging, sincere and factual book in many years. I highly recommend it to ANY teacher for a class on the subject. 1 of 1 people found the following review helpful. Excellent Comparison of the outcomes of Alcohol and Cannabis Use. By Old Tim This book was written by the folks who ran the Colorado initiative and I highly recommend it. The emphasis is on the antisocial outcomes of alcohol use vs cannabis use. The authors use quite a bit of statistical evidence to show that cannabis is safer (hence the name). In particular the relationship between alcohol and criminal and domestic violence and sexual assault and accidental injury and death is dealt with in some detail and the facts are quite alarming. The percentage of the above violent and criminal activity as well as accidental mayhem related to alcohol is shocking. Now that Colorado has legalized personal use of cannabis, it will be interesting to see if alcohol use and its problems decrease or not. Good book in any case.

Nationally recognized marijuana-policy experts Steve Fox, Paul Armentano, and Mason Tvert compare and contrast the relative harms and legal status of the two most popular recreational substances in the world--marijuana and alcohol. Through an objective examination of the two drugs and the laws and social practices that steer people toward alcohol, the authors pose a simple yet rarely considered question: Why do we punish adults who make the rational, safer choice to use marijuana instead of alcohol? *Marijuana Is Safer* reaches for a broad audience. For those unfamiliar with marijuana, it provides an introduction to the cannabis plant and its effects on the user, and debunks some of the government's most frequently cited marijuana myths. For current and aspiring advocates of marijuana-law reform, as well as anyone else who is interested in what is becoming a major political battle, the authors spell out why the message that marijuana is safer than alcohol must be a prominent part of the public debate over legalization. Most importantly, for the millions of Americans who want to advance the cause of marijuana-policy reform--or simply want to defend their own personal, safer choice--this book provides the talking points and detailed information needed to make persuasive arguments to friends, family, coworkers, and elected officials.

"In this thoroughly documented account, Fox, Armentano, and Tvert have performed a public service. They have pulled the sheet off the lie that gave us marijuana prohibition. In truth, it turns out 'The Devil Weed' is safer than alcohol. If that shocks you, you better read this book. It could be a game changer."--Mike Gray, author of *Drug Crazy: How We Got into This Mess How We Can get Out* "As the nation undergoes a shift in its thinking about drug policy, *Marijuana is Safer* offers a timely and forceful challenge to marijuana criminalization. Anyone with an interest in drug policy, whatever their perspective, should read this important work."--Alex Kreit, Director of the Center for Law and Social Justice, Thomas Jefferson School of Law "The follies of marijuana prohibition have never been laid bare with more erudition and plain common sense. *Marijuana Is Safer: So Why Are We Driving People to Drink?* is a book every citizen needs to read, and a question we all have to raise our voices to ask."--Barbara Ehrenreich, bestselling author of *Nickel and Dimed: On (Not) Getting By in America* and *This Land Is Their Land: Reports from a Divided Nation* "As one who has been entrusted with maintaining the public's safety, I strongly believe--and most people agree--that our laws should punish people who do harm to others. But by banning the use of marijuana and punishing

individuals who merely possess the substance, it is difficult to see what harm we are trying to prevent. From my own work and the experiences of other members of the law enforcement community, it is abundantly clear that marijuana is rarely, if ever, the cause of disruptive or violent behavior. That marijuana causes very little social harm is reason enough in a free society to legalize it for adults. But as Steve, Paul, and Mason so brilliantly demonstrate in this book, an even more persuasive reason is that by prohibiting marijuana we are steering people toward a substance that far too many people already abuse, namely alcohol."--Norm Stamper, former Chief of the Seattle Police Department

"Our current draconian laws prohibiting the use of marijuana by responsible adults are doubly flawed. Not only does such prohibition violate fundamental freedoms but also, as this book documents, it undermines personal health and public safety. Regardless of your views on the civil liberties issues, this book should convince you of another compelling justification for marijuana law reform: that it will promote health and safety for all of us, including our nation's children."--Nadine Strossen, former President, American Civil Liberties Union, and Professor of Law, New York Law School

"I have always maintained that the legalization of marijuana would lead to an overall drop in substance abuse in this country. In particular, the option of legal marijuana use, as an alternative to the death and violence associated with alcohol use, would be a welcome societal change. Surprisingly, though, there has never been a book dedicated to conveying this basic idea to the public. But with Marijuana is Safer, now there is. Kudos to Fox, Armentano, and Tvert for their remarkably insightful and important book."--Gary Johnson, former Governor of New Mexico

"I took great pride in my performance on and off the field, and often questioned why our culture embraces alcohol while simultaneously stigmatizing those who choose to consume a less harmful alternative, marijuana. Marijuana Is Safer makes an irrefutable case for liberating current cannabis policy by comparing and contrasting its use with that of alcohol. This outstanding book makes it clear that it is inconsistent, both legally and socially, for our laws to punish adults who make the 'safer' choice."--Mark Stepnoski, five-time NFL Pro Bowler and two-time Superbowl champion with the Dallas Cowboys

"Finally, a book that confronts the half-baked hallucinations of a drug policy gone mad. By adroitly juxtaposing the harms of marijuana and alcohol, the book shows just how badly America has overdosed on senselessly stupid marijuana propaganda and the prohibition laws it produced. If you are one of the millions of Americans who support keeping marijuana illegal but enjoy a good beer, glass of wine or cocktail now and then, I suggest you read Marijuana is Safer, rehab your mind, and get high on the facts. If, on the other hand, you already believe our marijuana laws are illogical, this book will give you hope that change is in the air--and show you how you can do your part to push it along."--David Sirota, nationally syndicated columnist and bestselling author of The Uprising and Hostile Takeover

"Marijuana Is Safer is both informative and timely. It explains the effects and actions of marijuana upon the body in plain and easily understandable terms. Most importantly, it shows the reader why the use of marijuana is much safer than the use of many if not most legal substances, including over the counter medications, tobacco, and most certainly alcohol. As a physician and public health educator, I highly recommend this book."--Gregory T. Carter, M.D., M.S., Clinical Professor of Rehabilitation Medicine, University of Washington School of Medicine

"Culture and law feel, at times, impossible to change; and then suddenly we find ourselves in a whole new place. America smokes a lot of pot, America drinks a lot of booze, and pot has not always been outlawed - it stands to reason that law and culture will change again. This book seems to herald that change is now upon us. It is smart and clear and feels like common sense. Pot and drink are two drugs people commonly use and one causes a good deal more violence and tragedy. Let's at least legalize the other one. It's an excellent argument. But don't just take my word for it--read the book."--Jennifer Michael Hecht, PhD, author of The Happiness Myth

"Marijuana Is Safer provides an informative, enjoyable, comprehensive look at all aspects of the plant from the cellular to the societal. Readers who are new to the topic will find the pithy summaries of this complex literature easy to follow. Experts will welcome the up-to-the-minute references to the latest work on a vast range of topics. Even the most devoted prohibitionists will soon find themselves scratching their heads as they learn the history and rationale behind current laws. Everyone will finish the text convinced that current policies need a thorough and immediate re-examination."--Mitch Earleywine, PhD, author of Understanding Marijuana and editor of Pot Politics

"Marijuana Is Safer: So Why Are We Driving People to Drink? is the most extensive and up-to-date book I've ever read regarding adults' relationship with the cannabis plant. If you've ever questioned whether marijuana is an objectively safer alternative to alcohol, this book has the answers. As challenging as its conclusion may be to the political majority, this collection of thought-provoking facts cannot be ignored."--Rob Van Dam, former World Wrestling Entertainment (WWE) Heavyweight Champion and host of robvandam.com and RVDTV

"You'd think that the definitive case against prohibition of alcohol or other drugs had been made by now. But Steve Fox, Paul Armentano, and Mason Tvert offer a provocative new argument: that marijuana is actually safer to use than alcohol, so it's doubly dumb to ban the drug that's actually safer. Abstemious folks like myself may be surprised to hear that, but you'll find some solid evidence in this book."--David Boaz, Executive Vice President of the Cato Institute, and author of Libertarianism: A Primer and The Politics of Freedom

About the Author Steve Fox is the Director of State Campaigns for the Marijuana Policy Project (MPP), the nation's largest organization dedicated to reforming marijuana laws. From 2002-2005, he lobbied Congress as MPP's Director of Government Relations. He cofounded Safer Alternative for Enjoyable Recreation (SAFER) in 2005 and has helped guide its operations since its inception. He is a graduate of Tufts University and Boston College Law

School and currently lives in Maryland with his wife and two daughters. You can visit SAFER online at www.saferchoice.org. Paul Armentano is the deputy director of NORML (The National Organization for the Reform of Marijuana Laws) and the NORML Foundation. A recognized national expert in marijuana policy, health, and pharmacology, he has spoken at dozens of national conferences and legal seminars and has testified before state legislatures and federal agencies. He appears regularly on Drew Pinsky's nationally syndicated radio show, Dr. Drew Live, and his work has appeared in over 500 publications. Armentano is the 2008 recipient of the Project Censored Real News Award for Outstanding Investigative Journalism. He currently lives in California with his wife and son. You can visit the NORML Foundation online at norml.org. Mason Tvert is the cofounder and executive director of Safer Alternative for Enjoyable Recreation (SAFER) and the SAFER Voter Education Fund. He appears frequently in the news and travels the country promoting the "Marijuana Is Safer Than Alcohol" message. He resides in Denver, where he serves on the city's Marijuana Policy Panel, appointed by Mayor John W. Hickenlooper. Read Mason's blog on The Huffington Post at www.huffingtonpost.com/mason-tvert.
