Dr Nils Hoppe, Dr Jos Miola : Medical Law and Medical Ethics before purchasing it in order to gauge whether or not it would be worth your time, and all praised Medical Law and Medical Ethics:

A focus on the interplay between medical law and medical ethics makes this refreshing new textbook the most balanced approach available to students of law and medicine. By offering a unique chapter structure which gives equal weight to both the legal and ethical issues it allows for an appreciation of all factors at play in the field of medical law. In addition, its student-friendly writing style combined with critical analysis gives students the tools to engage with

key issues and form their own understanding. Accompanying online case studies convey the law in practice, and encourage students to consider their own views and arguments in terms of legal analysis and ethical consideration. Coverage of recent judicial cases and statutes, with a good balance of factual detail and critical analysis, allows students to engage with this evolving discipline.

"A splendid text: clear, accessible, penetrating, thoughtful, well pitched for undergraduate students, yet useful and thought-provoking for more advanced readers. [An] unusually sophisticated treatment of the complex interplay of law and ethics. So far as the law is concerned, [it is] rigorously scholarly but always practical and down to earth. It's excitingly different from other books. I will be recommending it to students here in Oxford." Charles Foster, University of Oxford

About the Author
Nils Hoppe is Professor of life sciences regulation at Leibniz Universitaet, Hannover, a director of the Centre for Ethics and Law in the Life Sciences. He is also a group leader in the research cluster 'REBIRTH - From Regenerative Biology to Reconstructive Therapy', specialising in technology regulation and bioethics.
