Diana Wetherill, Roy Palmer : Medicine for Lawyers before purchasing it in order to gage whether or not it would be worth my time, and all praised Medicine for Lawyers:

0 of 0 people found the following review helpful. One StarBy Dawn UpshawTerrible.

Winner of the 2005 Society of Authors Minty Prize for the best medico-legal book, sponsored by the Medico-Legal Society.Devised especially for lawyers, rather than clinicians, this book explains medical concepts and considers medical risks associated with current practice.Written by recognised experts in each field who have extensive

experience of advising lawyers and the courts, this book is full of information, and based on the popular Medicine for Lawyers course of lectures held at the Royal Society of Medicine. This book is recommended as especially relevant to lawyers specializing in clinical negligence, medical law, and personal injury. Areas covered include: Anatomy * Intensive Care * Emergency Medicine * Anaesthesia * Surgery * Orthopaedics * Paediatrics * Obstetrics Midwifery * Gynaecology * Cardiology * Psychiatry * Urology * Radiotherapy Oncology * Plastic Surgery * Risk Management in General Practice

Ideally, this book could be a welcome addition to both law and medical schools. The contributors and editors are highly credible.... Truly a terrific primer for the practicing or newly minted lawyer. Well written, easy to follow, and a solid addition to the field. 4 Stars Doody's Service, USA... the editors have drawn on the experience of specialty authors who have extensive experience of appearing as expert witnesses, and who have a track record of providing sound advice regarding standards of care within their field... The general medical reader can gain a considerable amount of detail about clinical risks from this text, and I would recommend it to junior doctors in their Foundation training, in order to prepare them for effective clinical practice, whichever field they eventually move into. For 25 this is an exceptionally reasonable book, and I wholeheartedly recommend it to medics and law students/ legal practitioners alike. <http://www.forensicmed.co.uk/A> valuable basis for non-medics in a wide range of fields... it would surely be valuable to many legal practitioners, whose work is in medico-legal fields. Also, its utility would extend to academics not trained in medicine who seek a clearer knowledge in order to broaden the contextual foundation of their work... For lawyers, it adds to... digestible descriptions of what medical practitioners should do when presented with difficult situations, some of the practical difficulties that legal practitioners may fail fully to appreciate and rebuttals to some of the misconceptions commonly held by non-medics. Journal of Medical Ethics About the Author Roy Palmer is a Medico-Legal Consultant.
