nist : Modeling and Simulation of Healthcare Systems for Homeland Security Applications before purchasing it in order to gage whether or not it would be worth my time, and all praised Modeling and Simulation of Healthcare Systems for Homeland Security Applications:

The purpose of this document is to provide a foundation for establishing a modeling and simulation technical interest group whose focus is information exchange on healthcare issues. The document defines an initial set of user/customer needs and system requirements. Existing healthcare MS information sources and capabilities such as: projects, tools, standards, and data sets are also identified. The document concludes with a discussion of issues, concerns, and recommendations for advancing MS for healthcare systems. It also provides references. A glossary of terms is also

planned.
