Robert J. Sbordone : Neuropsychology for the Attorney before purchasing it in order to gauge whether or not it would be worth my time, and all praised Neuropsychology for the Attorney:

1 of 1 people found the following review helpful. Excellent book for traumatic brain injury litigators. By acannon@creative-net.net Very strong on the tests administered by neuropsychologists in evaluating TBI.

Regardless of how long you've practiced, the challenges of keeping current never stop. Now there is a source available that can assist you in wading through essential testimony of a neuropsychologist in your personal injury, medical malpractice or workers' compensation cases. Written specifically for attorneys, Neuropsychology of the Attorney is your personal guide through every aspect of the case. This book is the only available resource for assisting you through testimony by a neuropsychologist in cases involving mild head injury, traumatic brain injury, toxic exposure, post-traumatic stress disorder, hypoxia, memory or intellectual loss, and post-concussion syndrome, just to name a few. This is the book that has taught more attorneys how to work with frustrating head injury cases than any single publication ever published. Hailed for its format and coverage, Neuropsychology for the Attorney provides the legal, as well as the psychology and rehabilitation professional, with great insight into the intricacies of cases ranging from mild concussion to traumatic brain injury. This book provides even the most experienced professional with information critical to successfully serving the client. When you need full understanding of neuropsychology and how it impacts on your case when you work with a neuropsychologist when solid testimony is essential Neuropsychology for the

Attorney is for you.

...almost every significant fact, explanation and observation the practicing attorney needs to handle a head injury case calling for neuropsychological evaluation and testimony. -- Trial Magazine
