Eugene Goodheart : Novel Practices: Classic Modern Fiction before purchasing it in order to gage whether or not it would be worth my time, and all praised Novel Practices: Classic Modern Fiction:

"It is inspiring to have a new collection of Eugene Goodheart's critical essays. He is one of our best and most useful critics. W. B. Yeats spoke of the need to "hold reality and justice in a single thought." Goodheart knows the need and works hard to fulfill it. He never struts in the presence of the book he is reading, but is always (as if by nature and on principle) attentive, acute, alive to the issues. No writer could ask for a better reader or a more conscientious intelligence." Denis Donoghue, University Professor, Henry James Chair of English and American Letters, New York University "Eugene Goodheart is a critic whom this riven literary age cries out for. You'll find here none of the occult jargon or populist cant that pervades academic criticism or the increasingly glib present-mindedness of the higher literary journalism. His essays on George Eliot, Joyce, Lawrence, James, et al. each brilliantly reenvision the interface of realism and modernism and those on Bellow, Roth, McEwan, Franzen, et al. bring it up to date. *Novel Practices* is steadfast, resourceful, exhilarating." Ted Solotaroff, author *First Loves; A Memoir* "When you read Professor Goodheart's shrewd and perspicuous and engaging criticism, you are pleasantly reminded of the enduring critics of an earlier generation that is associated with New York City: Lionel Trilling, Philip Rahv, Irving Howe. He has their catholicity of taste, wide-ranging ease of reference, original perspective, and idiomatic style. You are struck by how he can reveal angles of a classic work such as Ford's *Good Soldier* or James's "Beast in the Jungle" that have been overlooked by the legions of critics who have already considered that work. Goodheart is one of the few critics today who is worth rereading." George Core, editor, *The Sewanee* "In earlier books a penetrating investigator of contemporary cultural and ideological controversy, Eugene Goodheart here surveys a range of classic modern fiction and related writings, exploring each work's and each author's emphases and contradictions against the relevant private or public background. In every instance it is the intelligence of the writer's reflection and of these determining backgrounds that serves as the critical focus. Frankly concerned with the "messages" conveyed by works of literature, his new book also stands as a long defense of narrational realism, not excluding those novels that pretend to live by language alone or by various deconstructive sophistries." Warner Berthoff, professor emeritus, Harvard University "In the subtle and probing essays collected in *Novel Practices*, Eugene Goodheart writes as both a sensitive reader of modern fiction and an analytic thinker shedding light on vital literary questions. On Philip Roth, for example, he offers not only a strong reading of Roth's late novels and curious memoir but also an illuminating account of the vexed relations between autobiography and fiction. This is a welcome book for any serious student of modern writing." Morris Dickstein, Distinguished Professor of English, Graduate Center, City University of New York
