Rachael Lorna Johnstone : Offshore Oil and Gas Development in the Arctic Under International Law: Risk and Responsibility (Queen Mary Studies in International Law) before purchasing it in order to gage whether or not it would be worth my time, and all praised Offshore Oil and Gas Development in the Arctic Under International

Law: Risk and Responsibility (Queen Mary Studies in International Law):

Offshore Oil and Gas Development in the Arctic under International Law explores the international legal framework for hydrocarbon development in the marine Arctic. It presents an assessment of the careful balance between States sovereign rights to their resources, their obligations to uphold the rights of Arctic inhabitants and their duty to prevent injury to other States. It examines the rights of indigenous and other Arctic populations, the precautionary approach, the environmental impact assessment and the duty to monitor offshore hydrocarbon activities. It also analyses the application of the international law of responsibility in the event that the State fails to meet its primary obligations in the absence of a State's wrongful conduct."

About the Author Rachael Lorna Johnstone, S.J.D. (2004), University of Toronto, is Professor of Law at the University of Akureyri, Iceland. She has published widely on state responsibility, human rights and Polar law.
