This book brings together papers from some of the most prominent thinkers of our time on the internet, law and the importance of open content licensing in the digital age. Drawing on material presented at the Queensland University of Technology conference of January 2005, the text provides a snapshot of the thoughts of over 30 Australian and

international experts on topics surrounding the international Creative Commons movement, from the landmark Eldred v Ashcroft copyright term decision to the legalities of digital sampling in a remix world. Open Content Licensing is a joint publication of Sydney University Press, Queensland University of Technology and CCI.
