Estate Planning Attorney, Francisco Sirvent reviews the 12 Deadly Sin of Estate Planning and How to Avoid Them in his first book. Learn how not having prepared a full estate plan can be costly--financially and personally. This informative estate-planning book explains why health care decisions must be made and properly documented so that loved ones can help with care decisions if and when a health crisis happens and about how plans that are not updated regularly can still send estates into the costly probate process. As the generation of baby boomers approaches retirement, this book outlines why those planning for retirement should also plan to protect assets and prepare for unforeseen health concerns.
