From Cambridge University Press : Patent Assertion Entities and Competition Policy before purchasing it in order to gage whether or not it would be worth my time, and all praised Patent Assertion Entities and Competition Policy:

Patent Assertion Entities (commonly known as 'patent trolls') hurt competition and innovation. This book, the first to analyze the most salient issues related to Patent Assertion Entities around the world, integrates economic theory with economic and legal reality to examine how the entities function and their impact on competition. It also offers legal and policy solutions that might be used to combat them. Edited by D. Daniel Sokol, the volume collects chapters from an array of leading scholars who describe Patent Assertion Entities in the United States, Europe, Korea, Taiwan, Japan, and China, while offering empirical accounts of the entities' economic consequences and their use of litigation as a means of legal extortion against many of the most innovative companies in the world, from startups to multinationals. It should be read by anyone interested in how Patent Assertion Entities operate and how they might be stopped.

About the Author D. Daniel Sokol is Professor of Law at the University of Florida, he focuses his scholarship on antitrust law. He is an Honorary Fellow of the Indian Institute of Corporate Affairs, Fellow of the George Washington Law School Competition Center, and a member of the American Law Institute.
