**Philip W. Grubb : Patents for Chemicals, Pharmaceuticals and Biotechnology: Fundamentals of Global Law, Practice and Strategy** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Patents for Chemicals, Pharmaceuticals and Biotechnology: Fundamentals of Global Law, Practice and Strategy:

0 of 0 people found the following review helpful. Title is misleading, this is not specific to phara chemistry By Eric

shaffer This is a general over view of the patent process. Only 14 pages are specific to chemistry or pharmaceuticals. Very disappointing given the excessive price. 6 of 9 people found the following review helpful. An outstanding publication  
By A Customer This is quite simply the best general work on patent law and practice I've ever read. Presented in clear, crisp language and with wit and flair, it is essential reading for anyone in the patent and allied professions and I would suggest mandatory reading for any students.

This third edition of the acclaimed *Patents for Chemists* provides vital updating and much expanded coverage while retaining the focus upon the relevant technology and industry practices. The book guides the reader through the legal and procedural complexities of the British, European, Japanese and US patent systems, and explains in detail the role of patent practitioners in maximizing the commercial potential of their client's or company's innovative products.
