**Fred K. Carr : Patents Handbook: A Guide for Inventors and Researchers to Searching Patent Documents and Preparing and Making an Application** before purchasing it in order to gage whether or not it would be worth my time, and all praised Patents Handbook: A Guide for Inventors and Researchers to Searching Patent Documents and

## Preparing and Making an Application:

This work first provides a general overview of the U.S. patent system, covering such issues as the patent document and patent infringement. The requirements of the invention and the conditions for patentability are discussed, with a focus on the patent application and the approval process. Major patent offices and international patent treaties are next examined, providing a full description of both the U.S. and international patent and classification systems. Methods for searching patent documents, the requirements of a reference, and general patent rights are discussed.
