All the trends and fashions and of course the great movies like "Breakfast Club." I loved all of that. The photos were great and the news stories were great to read also. You can't beat the price. 3 of 3 people found the following review helpful. love it! By lovetoread I absolutely love this book, great depiction of the 80s...the styles, hair, music, TV, movies, news, etc. People did a great job putting this book together. Nice, full-color pictures and adequate explanations to prompt the memory. Were there things left out? Sure, but overall it's a great overview of what was happening then. I would highly recommend this book to anyone who wants to remember the way it was "in our day." 1 of 1 people found the following review helpful. Totally Awesome 80's book

The 80's: If we remember correctly, they happened somewhere between disco and grunge, after platform shoes but before Friends. President Ronald Reagan sat in the Oval Office; Sixteen Candles and Raiders of the Lost Ark played at the multiplex; and, on the small screen, the invention of MTV meant that image, more than ever, could make a star. This was good news for Madonna, Duran Duran and Boy George and great news for A Flock of Seagulls. PEOPLE Celebrate the 80's takes you on a trip down memory lane with the stars, fads and moments you'll never forget.
