**Arthur Daemmrich, Joanna Radin : Perspectives on Risk and Regulation: The FDA at 100** before purchasing it in order to gage whether or not it would be worth my time, and all praised Perspectives on Risk and Regulation: The FDA at 100:

The Whole of Nature and the Mirror of Art exhibit was at CHF from July through December 2006, opening in conjunction with the International Conference on the History of Alchemy and Chemistry. Alchemy is extremely well represented in the Neville Collection. There are many of the famous emblem-books, numerous works on chrysopoeia (metallic transmutation), and scores of titles from little-known authors. The images in the exhibition and the catalog are photo reproductions of engravings from alchemical books published in the 17th century.

About the AuthorArthyr Daemmrich is an assistant professor at Harvard Business school and a senior research fellow at the Chemical Heritage Foundation. Joanna Radin is a graduate student in history and sociology of science at the University of Pennsylvania and a research fellow at the Chemical Heritage Foundation.
