Philippe Sands : Principles of International Environmental Law 2nd Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Principles of International Environmental Law 2nd Edition:

0 of 0 people found the following review helpful. Great resource.By UnknownExcellent desk resource for quick reference and brushing up of international laws related to environment. Often find myself referencing it in my day to day work.0 of 0 people found the following review helpful. Good resourceBy KaterinaI used this book as a resource for my LLM thesis and it was very helpful. It provides a very detailed account of the evolution of environmental law in the international arena - very useful as background/foundation knowledge.

This leading textbook has been revised to include new developments since 1994, including all the international case-law (ICJ, ITLOS, WTO, human rights, etc.) and new international legislation (genetically modified organisms, the Kyoto Protocol, oil pollution, chemicals, etc.). It is the most comprehensive account of the principles and rules relating to the protection of the environment and the conservation of natural resources. First Edition published by Manchester University Press: (2002) 0-719-04519-3

"This is the most important book on international environmental law ever published. It will change forever the way we think about the subject. I suspect it will have a major impact on the way we teach the subject. And it should change the way people write about the subject." *Journal of International Wildlife Law Policy*

About the Author Philippe Sands is Professor of Law and Director of the Centre on International Courts and Tribunals in the UCL Faculty of Laws. He is also a practising barrister, with extensive experience litigating cases before the International Court of Justice, the International Tribunal for the Law of the Sea, the International Center for the Settlement of Investment Disputes and the European Court of Justice.
