**Francis M. Pinckney : Products Comparison Manual For Trademark Users, 2nd Edition** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Products Comparison Manual For Trademark Users, 2nd Edition:

The biggest problem facing trademark attorneys who deal with selecting new trademarks, prosecuting trademark applications in the PTO, or litigating trademark rights is determining whether a client's mark used to identify a particular product might be confusingly similar to another similar mark used to identify other products. BNA Books Products Comparison Manual for Trademark Users is the only desktop reference that guides practitioners through the TTAB's findings on similarity of products for trademark uses and it has been for two decades. And now, the long-

awaited Second Edition of this handy reference covers 77 years of Board decisions and lets you search many of them electronically with an accompanying CD. Products Comparison Manual for Trademark Users, Second Edition contains over 27,000 product comparisons by the Trademark Trial and Appeal Board (TTAB), covering the Board's decisions since 1931. Included in the book are citations for every comparison, so decisions can easily be found in U.S. Patents Quarterly, in the Official Gazette, or on the PTO Web site. All of the terms and comparisons from the book are provided on an accompanying CD-ROM, so that these comparisons are instantly searchable by product, class number, finding, or citation. To help practitioners do the most complete search possible of similar products, the authors have analyzed the findings of the courts and/or the Board in order to impose editorial uniformity on the descriptions of products listed in the cases and has assigned U.S. Class numbers to each product. The products are then aggregated by Class number so that users can review these Class listings to more easily find synonymous product terms and closely similar products that were discussed in other cases and which may have a bearing on the issue in question. Products Comparison Manual for Trademark Users is a convenient and readily accessible source of data that will be useful in trademark infringement proceedings and for trademark registration matters. This data will permit the user to identify and locate virtually all decided cases which have compared products of interest to the user, with other products for trademark purposes. Citations are provided for all such cases. The user's review of the Board decisions will provide a basis for making an informed judgment about whether two products, each identified by the same or similar marks, are confusingly similar in the context of trademark infringement or trademark registration.
