I love reading about the law and this book definitely helps me achieve those ends. Thanks again! 4 of 5 people found the following review helpful. Not worth the \$ By Attyin VA Those familiar with law school study aides or bar review course study aids will be disappointed with this book. It's not particularly well written, and it doesn't give enough sample questions and answers to allow someone to use it as an MPRE study guide. I'm not sure of the audience for this book, but as someone who browsed or purchased study guides and overview books from a number of

publishers, I'm definitely not one of them. A person would be much better off just reading the rules themselves than wasting time on this book. 2 of 3 people found the following review helpful. Beware the out of date MR used in this book!!!! By P. Lee I just got this book last week. I found that some of the content are out of date. The book is based on a pre-2003 version of MR. Other aspects are okay.
