The author gave a voice to every child caught in the nightmare of parental alienation. It is hard to believe that laws can still be so lopsided. I must give credit to the author/step mother for her attention to detail in recounting this story. She obviously did her homework when trying to

work with the system that so badly failed this child. I highly recommend this book. 0 of 0 people found the following review helpful. Protecting Emilie - a must read for parents fighting custodial injustice By Kristina Clements Protecting Emilie is an eye opening book into the struggles brought on by the failure of our court system to truly protect children who are victims of one parent alienating the child from the other parent. This book reveals how parental alienation destroys the emotional development of innocent children. You will feel a true call to action after reading the story of Emilie and see how Florida Family Law failed her so miserably. I found the book to be extremely engaging, read it in two days, and have thought about what it revealed every day since. Protecting Emilie is a must read for anyone seeking just custodial rights and finding their innocent child stuck in a drama they don't deserve. 0 of 0 people found the following review helpful. Thank you for shedding light on such a horrific situation. Well done! By Customer I am so thankful for this book. It shines an ever growing light on a hidden epidemic in our society today. Lisa does a wonderful job laying out all the terrible, scary and all too real issues that Emi and all too many other children face when a parent alienates them from the other parent. Lisa's first hand knowledge is well captured in this book. A must read for any parent going through a custody battle. The courts and system must wake up now before more children such as Emilie have life long issues. Thank you Lisa and well done! Tom Jones

From the Back Cover At two years old, Emilie's parents divorced. By the time she was five, her innocence was already stolen. Her mother, Andrea, so enraged over the dissolution, began a rancorous campaign to get back at her ex, Patton. Lies, manipulations, alienation, withholding custody, and making false child abuse allegations ultimately led to the diagnoses of Emilie's Clinical Depression, Eating Disorder, PTSD, and Conversion Disorder. Emilie was cutting and burning the flesh of her own body; she was later Baker Acted and suicidal. Andrea, a master manipulator, convinced the Pinellas County, Florida judges she was innocent. With more than a dozen witnesses against her at a three-day custody trial, yet another judge remained unmoved over the effects parental alienation actually had on its helpless victims. Judges ambivalence enabled and empowered Andrea. Yet when Patton learned that Emilie was also being physically abused by her mother, he refused to return her to Andrea that night at 8pm when she was expected. By 11pm, Patton was unlawfully arrested and jailed for interference with custody, a civil right, not a crime. Due to the witnessing of her only loving parent being incarcerated, a childhood full of alienation, and emotional and physical abuse, Emilie suffers with a lifetime of scars ongoing mental health issues and low self-esteem. Emilie is one of thousands of children in the United States suffering this familial tragedy. Only awareness and forcing judges to uphold the child abuse statutes, which clearly include "mental infliction" in its definition, will stop this exploitation. Please share this story, follow us on social media and petition your family courts to have parental alienation treated as the horrific child abuse that it is.
