Jill Greenfield, William Latymer-Sayers : Quantifying Catastrophic Injuries before purchasing it in order to gage whether or not it would be worth my time, and all praised Quantifying Catastrophic Injuries:

This brand new title will provide practical guidance and immediate solutions for the practitioner by way of strategies

for case management, from the moment of taking on the claim to the finalisation of the case and the financial considerations * There will be provision of detailed narrative, source material as appropriate and precedent material such as orders for periodical payments. Quantifying Catastrophic Injuries will cover injuries such as brain, spinal, serious limb, serious clinical negligence cases, orthopaedic injuries and psychiatric injuries. The text will be broken down into four main areas: 1. The Injury: Brain injury; Spinal cord injury; Serious orthopaedic injury; Clinical negligence; Psychiatric complications 2. Rehabilitation: Care; Occupational therapy and aids and equipment; Housing; Prosthetics 3. Quantifying Claims: The use of Ogden VI; Local Authority funding; Interim payments 4. Managing Finances: Periodical payments v lump sum; The use of the Court of Protection and the use of Trusts.
