Li Jiang : Regulating Human Embryonic Stem Cell in China: A Comparative Study on Human Embryonic Stem Cells Patentability and Morality in US and EU before purchasing it in order to gage whether or not it would be worth my time, and all praised Regulating Human Embryonic Stem Cell in China: A Comparative Study on Human

Embryonic Stem Cells Patentability and Morality in US and EU:

The general scope of the book is the patentability and morality of human embryonic stem cell research in US, EU and China. The book observes fraudsters operate unsafe human embryonic stem cell therapies and officialdom turns a blind eye to the immoral human embryonic stem cell research in China. The book highlights that both patent control and federal funding control are inefficient and ineffective way to monitoring human embryonic stem cell research. The book finally proposed an approach for china to regulating human embryonic stem cell research-regulating research itself at the reconciled international regime.

From the Back CoverThe general scope of the book is the patentability and morality of human embryonic stem cell research in US, EU and China. The book observes fraudsters operate unsafe human embryonic stem cell therapies and officialdom turns a blind eye to the immoral human embryonic stem cell research in China. The book highlights that both patent control and federal control are inefficient and ineffective way to monitoring human embryonic stem cell research.
