From Golombok Susan : Regulating Reproductive Donation before purchasing it in order to gauge whether or not it would be worth my time, and all praised Regulating Reproductive Donation:

The emergence of new empirical evidence and ethical debate about families created by assisted reproduction has called into question the current regulatory frameworks that govern reproductive donation in many countries. In this multidisciplinary book, social scientists, ethicists and lawyers offer fresh perspectives on the current challenges facing the regulation of reproductive donation and suggest possible ways forward. They address questions such as: what might people want to know about the circumstances of their conception? Should we limit the number of children donors can produce? Is it wrong to pay donors or to reward them with cut-price fertility treatments? Is overseas surrogacy exploitative of women from poor communities? Combining the latest empirical research with analysis of ethics, policy and legislation, the book focuses on the regulation of gamete and embryo donation and surrogacy at a time when more people are considering assisted reproduction and when new techniques and policies are underway.

"This excellent interdisciplinary volume clearly combines the empirical research and the theoretical debates, creating ethical discussions that for once are applicable to actual family situations." Fiona MacCallum, University of Warwick
About the Author Susan Golombok is Professor of Family Research and Director of the Centre for Family Research at the University of Cambridge.
