Geert Van Calster, Wim Vandenberghe, Leonie Reins : Research Handbook on Climate Change Mitigation Law (Research Handbooks in Environmental Law series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Research Handbook on Climate Change Mitigation Law (Research

Handbooks in Environmental Law series):

Governments around the world have been trying to find ways to reduce greenhouse gas emissions for decades. This detailed Handbook considers the spectrum of legal and market-based instruments as well as strategies and policies adopted around the world and suggests more effective, comprehensive and responsive ways of managing climate change mitigation. As well as taking stock of the current and proposed legal instruments, the book looks at the wider policy and economic aspects of coping with climate change. It provides a comparative overview of key issues across Europe, the United States, Asia-Pacific and the BRICS countries, and discusses domestic, regional and international law and governance. With perspectives from academia, government and private practice, the expert contributors analyze key sectors such as energy, transport, buildings, industry, land use and waste. Important issues such as carbon trading, financing and litigation are also addressed. The book demonstrates the variety of approaches taken and their challenges with a view of fostering more effective and pragmatic ways of managing climate change mitigation. This timely book will be an authoritative resource for scholars of climate change law and policy, whilst also providing a rigorous overview for upper-level students. Policymakers will gain insights from the comparative perspectives, and practitioners will appreciate the broad range of practical issues addressed. Contributors: M. Alessi, J. Allmon, D. Belis, L. Berzanskis, N. Bin Zahur, S. Bogojevic, D. Conway, C. Egenhofer, J.B. Eisen, B.J. Evans, N. Fujiwara, M.B. Gerrard, K. Hussey, M. Iguchi, S. Kakade, E. Knight, A. Korppoo, J. Li, J. Lin, H.
