**From Edward Elgar Pub : Research Handbook on Intellectual Property Law and Competition Law** before purchasing it in order to gage whether or not it would be worth my time, and all praised Research Handbook on Intellectual Property Law and Competition Law:

This comprehensive Handbook brings together contributions from American, Canadian, European, and Japanese writers to better explore the interface between competition and intellectual property law. Issues range from the fundamental to the specific, each considered from the angle of cartels, dominant positions, and mergers. Topics covered include, among others, technology licensing, the doctrine of exhaustion, network industries, innovation, patents, and copyright. Appropriate space is devoted to the latest developments in European and American antitrust law, such as the 'more economic approach' and the question of anti-competitive abuses of intellectual property rights. Each original chapter reflects extensive comments by all other contributors, an approach which ensures a diversity of perspectives within a systematic framework. These cutting edge articles will be of great interest to law professors and postgraduate students of intellectual property and competition law, as well as those interested in innovation and competition theory, and legal practices in intellectual property and competition law.

'The volume offers an outstanding collection of studies on the interaction of IP and competition policy and is highly recommended for academics, graduate students, and practitioners with an interest in more theoretical studies.' -- Ioannis Lianos, *World Competition* 'Each chapter in the Research Handbook on Intellectual Property and Competition Law is written so lucidly that it will be of great interest to law professors and post graduate students of intellectual property and competition law, as well as those interested in innovation and competition theory, and legal practices in intellectual property and competition law.' -- Madhu Sahni, *Journal of Intellectual Property Rights* 'This is a book that delivers on its promise. With a strong cast of contributors from a variety of countries, economies and disciplines, it makes the reader wonder how any commercially attractive IP ever gets exploited at all.' -- IPKAT 'Here it comes: the book that I have been waiting for! This will surely be an inspiring source of knowledge in my Masters Programme in European Intellectual Property Law at Stockholm University. While promoting intellectual property protection as an important means for innovations and cultural developments, a critical analysis and a flexible approach to the needs for free creative space and effective competition is crucial. As this book so well illustrates, this delicate balance is no either or.' -- Marianne Levin, Stockholm University, Sweden  
About the Author Edited by Josef Drexler, Director, Max Planck Institute for Innovation and Competition, Munich, Germany
