From Marvin Kraushar : Risk Prevention in Ophthalmology before purchasing it in order to gage whether or not it would be worth my time, and all praised Risk Prevention in Ophthalmology:

Being served with a lawsuit wouldnt just ruin your day. It could ruin a clinicians professional and personal life. Written for physicians by physicians, this important book concisely and pragmatically answers many of the questions

surrounding medical malpractice. With an emphasis on clinical matters and a minimum of "legalese", this book shows ophthalmologists how to avoid law suits in the first place. It also examines what happens should litigation occur and provides insights into both defendant and plaintiff perspectives. Covering the legal issues for all of ophthalmology, here at last is a book that provides the busy clinician with the tools necessary to reduce the risk of lawsuits.

From the Back Cover
In Risk Prevention in Ophthalmology, many of the questions surrounding medical malpractice are answered clearly, concisely and pragmatically for physicians, by physicians. Written with an emphasis on clinical matters, this book shows ophthalmologists how to avoid lawsuits in the first place. What does "risk assessment" mean in the real world? How truly informed are your patients after signing your consent forms? Do your patients have reasonable expectations regarding outcomes? Are your history-taking and record keeping habits leaving you exposed? Are you sufficiently careful with documentation? What is quality assurance? TOPICS COVERED: Causes of litigation. Poor communication. Cataract surgery. Retinal detachment. Prescribing and drugs. Glaucoma. Trauma and Intraocular foreign bodies. Medical retina. Retinopathy of prematurity. Anesthesia. Oculoplastic. Strabismus. Tumors. Neuro-ophthalmology. Why patients sue. The four most effective risk prevention techniques. Identifying and managing the litigious patient. Natural history of a medical malpractice claim. Hiring your own attorney. Selection of an expert witness. Discovery. Interrogatories. Examination before trial (deposition). Consideration of settlement. Trial testimony and courtroom behavior. Damages w Appeal. Covering the legal issues for all of the areas of subspecialty in ophthalmology, Risk Prevention in Ophthalmology provides the busy clinician with the tools necessary to reduce not only the risk of potential lawsuits, but also insights for coping with actual ones. About the Author
Dr. Kraushar is an adjunct professor at Mt. Sinai in New York, but spends the bulk of his time in private practice. Dr. Kraushar has been in practice for nearly twenty years and had published literally dozens of articles in the most highly cited ophthalmology journals discussing the issue of medical malpractice. Unusual among presenters at the American Academy of Ophthalmology because he is not primarily an academic doctor, he nonetheless has chaired multiple symposia at the AAO annual meeting on the subject.
