His stories are detailed, well-written, and full of useful information. After reading "Robbed," I feel MUCH more prepared to protect both myself and my future clients from ethical/legal harm. Not to mention, any book that starts with a Woody Guthrie quote is a friend of mine! Definitely give this book a read. 0 of 2 people found the following review helpful. Lawyer's view By

MGAs a lawyer, I think the book is incredibly insightful. As an avid reader, I think the book is entertaining and provocative. Well done.

At a time when it seems everyone has his hands in your pocket from the government to the credit card companies to your family lawyer you need someone to protect you from an army of scam artists. In *Robbed at Pen Point*, attorney Randy Johnston tells readers who is scamming you, what scams to watch out for, how to avoid being taken and how to get even if you do. Besides pointing out the bad guys, the author notes that people who lose money in an economic downturn often take foolish chances in an attempt to make up for their losses. "That's when crooks make a killing," he says.

About the Author Randy Johnston is a renowned professional malpractice attorney who has spent three decades suing lawyers, investment advisors, accountants, financial planners, and business partners who rob with a pen instead of a gun.
