**From Routledge :** Routledge Handbook of International Environmental Law (Routledge Handbooks) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Routledge Handbook of International Environmental Law (Routledge Handbooks):

The Routledge Handbook of International Environmental Law is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law (IEL). The Handbook

features specially commissioned papers by leading experts in the field of international environmental law, drawn from a range of both developed and developing countries in order to put forward a truly global approach to the subject. Furthermore, it addresses emerging and cross-cutting issues of critical importance for the years ahead. The book is split into six parts for ease of reference: The Legal Framework, Theories and Principles of International Environmental Law - focuses on the origins, theory, principles and development of the discipline; Implementing International Environmental Law - addresses the implementation of IEL and the role of various actors and institutions, including corporations, intergovernmental organisations and NGOs; Key Issues and Legal Frameworks - brings fresh perspectives of the common general issues of international environmental law, such as biological diversity and marine environmental law; Regional Environmental Law - explores the specific regimes developed to address regional environmental issues, considering the evolution, prospects and relationship of regional law and mechanisms to IEL; Cross-Cutting Issues - considers the engagement of international environmental law with other key fields and legal regimes, including international trade, human rights and armed conflict; Contemporary and Future Challenges - analyses pressing current and emerging issues in the field including environmental refugees and climate change, REDD and deforestation, and treaty congestion in IEL. This up-to-date and authoritative book makes it an essential reference work for students, scholars and practitioners working in the field.

About the AuthorShawkat Alam is a Senior Lecturer and Director of the Centre for International and Environmental Law at Macquarie University where he teaches and researches in the areas of international and environmental law. His recent publication includes *Sustainable Development and Free Trade* (Routledge, 2008). Md. Jahid Hossain Bhuiyan teaches law in the Department of Law, ASA University Bangladesh.
